5x International Hackathon Winner seeking 2025 Software Engineering Internship & Full-Time Opportunities

Education

SRM University– Bachelor of Technology (B.Tech) in Computer Science

Expected June 2025

Skills

Languages: Javascript, HTML, CSS, Python, SQL, Typescript

Technologies: ReactJS, NodeJS, ExpressJS, Git, Webpack, Postman, Jest, Prisma, Linux

Concepts: Object Oriented Programming, Software Development, Artificial Intelligence

Experience

Digitization Intern, Opinion & Ownership– Chennai, India (Hybrid)

Oct–Dec 2024

- Boosted efficiency by **40%** through document digitization and form creation, reducing processing time.
- Cut document errors by **20%** through collaboration and regulatory-aligned digital solutions.
- Enhanced retrieval and organization by implementing a robust indexing system, reducing search time by **30%**.
- Streamlined workflows by automating repetitive tasks, saving **15+** hours weekly.

Software Engineer Intern, Equitas Small Finance Bank– Chennai, India (Onsite)

Sep–Oct 2024

- Enabled multi-language support for a banking app used nationwide by automating translation into **12** languages.
- Secured transactions by **30%** with a payment gateway front-end using form validation and **CRC** checks.
- Localized content to improve accessibility for diverse linguistic users across India.
- Optimized app performance with efficient code and thorough testing for seamless localization integration.

Web Developer Intern, Music Bloggers Network– Remote

2021–Present

- Increased site traffic by **20%** with responsive **WordPress** designs for mobile, tablet, and desktop platforms.
- Improved visibility and engagement by implementing SEO and analytics tools.
- Delivered user-friendly designs tailored to client needs, boosting usability and satisfaction.
- Converted high-fidelity **Figma** designs into functional code, ensuring seamless integration and consistency.

Projects

CTRL + ALT + DESIGN | React, Tailwind, Express, ElevenLabs, Magic Loops, Qwen

github.com/Warfarian/ui-gen

- Developed an AI assistant for converting voice commands to responsive UIs, **winning 1st place** for Magic Loops and Conversational AI at Nosu AI hackathon.
- Reduced website creation time by **70%**, enabling rapid transformation of ideas into websites.
- Engineered image generation via **Magic Loops/Unsplash API**, delivering **20+** high-res images per session.
- Implemented multi-device previews, code export and a voice-guided UI, boosting accessibility by **35%**.

The Oracle's Tavern | Phaser, React, Express, Twilio, Elevenlabs, DeepseekV3

github.com/Warfarian/oracle

- Created a medieval AI game where players act as a digital oracle, **winning 1st place** for Twilio API Magic.
- Designed a dialogue system with progress tracking, answer evaluation and a rank system to increase engagement.
- Built on **React, Phaser.js, Express, and MongoDB** for seamless, engaging gameplay.
- Integrated animated characters, voice acting (**Elevenlabs**), and dynamic interactions for immersive user experience.

Certifications

Crash Course on Python (Google) | UiPath Automation Explorer for Students (ICTACADEMY)

Introduction to Software Engineering (IBM) | Fundamental Algorithms: Design & Analysis (NPTEL)

Database Foundations (Oracle Academy)
